How to Order. Remember It is easy to make mistakes, and guard against them by systematically following these rules:

Address Letter Carefully. State what you want by Name and Number in Catalogue. Don't make clippings. State How Much you Enclose. Don't Forget to Add Postage. Sign Your Full Name and Address, Town, County and State.

If you want to make a complaint, or ask a question, write on a separate sheet as it goes in a separate department from your order.

How to Remit. This may be done in any of the following ways:—

1. CASH, in bills or silver; Silver should be well wrapped to prevent cutting through envelope; small amounts need not be REGISTERED which cost 8c.

2. POST OFFICE MONEY ORDERS are now very cheap and are SAFEST.

3. Drafts on N. Y. can be bought at any bank; Private Checks will be accepted, but your order must be kept until they are paid. So don't send them unless certified.

4. Postage Stamps will be taken for sums under \$1.00, but we don't like them; in warm weather lay paper between to prevent sticking.

Mutilated Coin is worth its weight as old Silver ONLY, which is little over one-half. DON'T SEND IT—but if you do, SEND ENOUGH. We will not take it at face value.

Private Checks. As stated elsewhere we do not receive private checks as cash; we have so many returned marked "N.G." that we are obliged to make this rule invariable. If you Send an Uncertified Check we must Hold your Order until it has been Cash'd. To save this delay make your remittance in other form.

Terms. Our Terms are simply CASH WITH ORDER "F.O.B.N.Y." We deliver goods to your order here in the city either to Post Office, Express or Freight Company, and there our responsibility ceases. We give no credit, pay no postage, nor freight, except in a few cases where mentioned in catalogue. We do not send goods C.O.D. unless one fourth the amount is sent to guarantee charges.

Postage Stamps. we will accept them for small amounts (under \$1.00) and where Money Orders are not obtainable. But they must reach us in perfect condition; 1 and 2 cent denominations preferred. If you can get Money Orders either P.O. or Express, please do it as it is safer for you and suits us much better. Many small lots of stamps make a large lot, and \$5,000 worth (which we frequently accumulate,) are not easy to "work off" even at a discount.

HOW TO HAVE GOODS SHIPPED. We do not deliver Goods Free. Our prices are "free on board" here. Please bear this in mind when ordering. We constantly receive small orders which we know our customers do not expect to receive by express though they give no shipping directions nor enclose postage. Where we consider it practicable or economical to mail goods we give the amount of postage required on each piece under each article and this amount must be included with your remittance, otherwise we are compelled to write for it, thus delaying your shipment. Where goods are not to be mailed it is well to order them shipped "by cheapest way" which our clerks can readily determine.

THE MAILS are a great convenience but are too expensive on many goods. We do not wish to have you save 25 per cent on a purchase and lose a large part of it in costly transportation—and therefore advise you to avoid the mails as much as possible by ordering a quantity of goods by freight or express. We do not guarantee the safe delivery of goods sent by mail. We pack properly and deliver to post office; there our responsibility ceases. In case of loss we do all in our power to recover the package. There is probably not a loss of one per cent on mail packages. Valuable packages may be registered for 8 cents.

Prepaid Express. All the leading Express Companies forward packages if prepaid at a special rate of 15c. for any package weighing 15 oz. or under and 1 cent for each extra oz. to all points East of the Mississippi. They also carry BOOKS and other 3rd-class postal matter under same conditions at 10c. for first 1½ lbs. or less and 1c. for each added 2 ounces. While this is no cheaper than mail rates we recommend it, as it is much safer.

We insure the safe delivery of mail packages at the rate of 10c. for goods valued under \$5.00 and 15c. for \$5.00 to \$10.00. To those who do not wish to run any risk this is a satisfactory method.

Errors and Omissions.

Mistakes will happen. We employ skilled people in order to minimize them, but still they occur; if you do not get goods promptly or get unsatisfactory goods, write us; don't "kkek" any more than you must but any way write and when you write, be sure and state the facts, viz: When you ordered; how much you sent and in what form, cash, stamps, etc.; what you ordered. Your complaint will then have prompt attention.

"C. O. D." There are advantages and disadvantages in sending goods C. O. D.—You do not have to pay for them till you get them (and see them if you wish), but you have to pay charges for returning the money to us.—We guarantee all goods to be as REPRESENTED and as you get to know us you will avoid this useless expense.

DON'T ASK FOR CREDIT. The key note spelled thus C-A-S-H—we pay cash to get low prices and must GET cash to PAY—were we to do a credit business as most merchants do, we would be compelled to add 10 to 25 per cent to our prices. See?

NOT A PURCHASING AGENCY. We don't send out for the goods when we get an order and perhaps get something else "just as good"—but different; before listing an article we have a good stock of it on our shelves so that we not only know we can fill your order with the exact thing we advertise, but we can do it at once; many think from the magnitude of our list that we can't have everything in stock; a walk of a half mile through our ten immense floors would show every item in this book in generous quantities.

NOT AN AGENTS' SUPPLY HOUSE.

We are the Agents. That is, we are the only link between you and the manufacturer. We never buy of jobbers but always of the maker. We don't refuse "agents" orders and call their attention to the wholesale prices we quote, which are as low as those of regular jobbers; but our aim is to supply consumers at prices agents, storekeepers and "the trade" in general pay.

WE DO NOT PAY POSTAGE or Express-ago except

in a few cases where it so mentioned in connection with article. Where goods may be mailed economically and safely we give the amount of postage required which must be always added to price.

Hand It Along.

Sometimes more than one of our catalogues may fall into your hands. If so, you will do us a great favor to hand the extra one to a friend with such remark as you see fit to make. It should not be wasted—it's too good.

We Guarantee all goods bought of us to be exactly as represented herein. Your money back if they prove otherwise.

Our Addresses are never sold to Quack Doctors, Patent Medicine Men, Fakirs or Schemers, as other Mail Order Houses do. Mothers can feel assured that their children will not be in receipt of obnoxious and dangerous reading matter now flooding the mails, as their addresses are never sold by us.

Hundreds of letters are received daily by us asking numerous questions about our goods, but never enclosing a two-cent stamp for reply. The amount expended each year in answering these letters is very great, and hereafter to insure a reply, customers must always enclose a 2-cent stamp.

SPECIAL INDUCEMENTS!

In addition to the bed-rock prices quoted in "OUR SALESMAN," we offer further extraordinary inducements for QUANTITY ORDERS. There is absolutely no profit in small mail orders, and to pointedly call our patrons' attention to this fact and secure an increased proportion of profitable orders, we make the following very liberal premium offers:

PREMIUM NO. 1. FOR 50C. TO \$1.00 GOLD PLATED RING, the usual retail value of which is..... **15C**

PREMIUM NO. 2. FOR \$1.00 to \$2.00 ALASKA DIAMOND SCARF PIN. An elegant Never sold at less than 50c. and frequently..... **\$1.00**

PREMIUM NO. 3. For \$2.00 to \$5.00 A set of FOUR SILVER and GOLD PLATED STICK PINS of new and novel design; worth at least..... **40C**

PREMIUM NO. 4. For ORDERS OF \$5.00 AND OVER. A set of best SOLID STERLING SILVER DUMB-BELL CUFF BUTTONS, of latest design and perfect workmanship. Lowest retail value..... **\$1.00**

These premiums are NOT given where CASH DISCOUNTS are taken.

In ordering state the number of Premium claimed. These Premiums are made very attractive and will be found fully equal to representations, and are well worth expanding your order to obtain.

CASH DISCOUNTS. It is obvious that on large purchases our expense of handling an order is less. We will give you the benefit, allowing you a discount corresponding to the amount of your purchase, as follows:

\$5 to \$10.....	3 Per Cent.
10 to 20.....	4 Per Cent.
20 to 50.....	5 Per Cent.
50 and Higher.....	6 Per Cent.

This is a large discount on goods sold as closely as ours, and is only allowed when cash comes with order. You will find it profitable to "club" with your neighbors in ordering, thus obtaining a larger discount and cheaper transportation.

Note.—This discount is not allowed in addition to any premium or combination offer.

Read Our Prices!

You may think this Salesman just like its predecessors—a sort of old story, and throw it aside. BUT DON'T! There are changes. Many new goods are offered; many many new prices are quoted. When we look at some of our old prices we are almost ashamed as they are 3, 4 and sometimes 10 times higher than now, but it's all right. Simply mercantile evolution—and the game is still on—AND YOU WANT TO WATCH IT! Read our prices.

Special Note. While prices are being advanced all along the line of imported goods, we call our customers' attention to the fact that in no case have we raised a price and in scores of cases, lowered them—and for the present will not do so.

"Special" Prices for "Special" Reasons.

When we get a way inside price from a manufacturer; when we have something we are particularly anxious to push along; when we have a heavier stock than our trade will absorb promptly, then we put the word "Special" before our dozen price and after that word we put figures worthy your attention. They are manufacturers' jobbing figures.

References.

If you have access to Dun's or Bradstreet's Mercantile Reports you will find us well rated therein. Any wholesale house or bank in this city will speak well of us. We could fill volumes with flattering testimonials from nearly every city and town, but after all is said, the proof of the pudding is only in the eating. Send us a trial order and let our goods testify for us. We occupy 10 immense floors at this address where we sell all the goods advertised. At Linden, N.J., we have one of the finest factories in the country where 200 to 300 hands are employed making our peerless specialties. At Waterbury, Conn., our watch factory employs over 500 people, producing our cheapest American Watches. In fact, everything is complete to enable us to carry out our plan of producing the best goods at lowest cost and placing them directly in the hands of the consumer without the intervention of profit absorbing middle-men.

NOTICE THE DIFFERENCE.

Two-Piece Crank Hanger and other important features make it practically an 1899 wheel; the other kind have as a rule been made up for a year or two, or if recently built it is from old style material, of inferior quality at that.

Why Ingersoll Wheels Beat the World!

We have hundreds of times been asked by those who know our extraordinary facilities for producing things cheaply and marketing them direct to the consumer in immense quantities, why we have not before this commenced the **Manufacture of Bicycles**. To this we have replied that the time was not yet ripe for making wheels at **Popular Prices** and until we could do this we would **Stay out**. NOW the Time IS Ripe and we have **GONE IN** body and soul, and we are showing what may be done under favorable circumstances. We have for years done the largest jobbing business of any house in the world in **Bicycle Parts and Fittings**. We have also been manufacturing many of the most important parts. We have made alliances with all the largest producers which gives us the **Inside Track**—inside even of the largest wheel makers of the world. Makers of Steel Tubing, Cranks, Sprockets, Chains, Pedals, Etc., whose whole product in many cases we have bought for cash during several years, naturally give us lowest possible prices and choicest goods.

Another Point. Bicycle Manufacture has undergone a revolution in the past few years and largely within a short time. Two or three years ago wheels were made cheapest in the largest factories where every part was made and nothing bought outside, the largest factories even producing their own tubing and tires. Being thus strongly entrenched, these large monopolies charged excessive prices and "held prices up" (and held the public up.) But in this great country such conditions are not long possible. Thousands of bright, active men and concerns saw the game and almost simultaneously they started to beat it. Men with a few thousand dollars knew they could make wheels if they could get "parts" and progressive manufacturers knew they could make parts if an outlet could be found for them. We knew all these people and helped bring them together and the result is that to-day there are a thousand makers of a few wheels per week instead of a few making a thousand wheels per week and the big monopolies are "suing for peace" and trying to find out how **THEY can Compete** with the **SMALL Wheel Builders**. Many of them have failed, others have closed down, some are buying parts and competing and some are going on and losing some of the millions they have made.

As to Ourselves. We occupy a position which is out of reach of competition of either "horn of the dilemma." The large makers can't touch us for reasons stated above. The small ones can't because we are the people who sell them the parts at a profit which they have to add to the price of the wheels. We make or buy the parts at very near the original cost to produce in immense lots by factories which do nothing else and can therefore make them at the lowest possible price. Our Brazing, Enamelling, Plating and Assembling rooms are the largest and best equipped in the country. They contain every modern appliance for building the finest wheels at the lowest price.

Our Assembling Perfect.

In our wheels we have not only given closest attention to the selection of the best and most approved style of parts but also to their relation to each other and the assembling of them to produce wheels of the highest running type. The running gear of a wheel is its vital feature and it involves not only perfect parts but the assembling of them in perfect relation to each other. In this our wheels are equal to the best.

No Fancy Price. When you buy one of the "Standard" make of wheels you pay at least 1/2 of your money for advertising, "name" and expensive paraphernalia of large concerns. When you buy an Ingersoll Wheel you pay only for what you get. You pay the original manufacturers cost of the parts, bought in immense quantities, you pay for building and finishing the wheel a price not exceeding \$3.00 or \$4.00, which includes our profit. In fact you almost get the wheel for the bare price of the material in it.

Our Triple Guarantee.

Besides the Guarantee adopted by the Association of Cycle Manufacturers, the same as is given with all the best and leading wheels, we personally guarantee each and every wheel of our manufacture to be free from defects in material and workmanship. We further guarantee entire satisfaction and will promptly refund your money if you do not find our wheels the greatest value you have ever known.

Ladies' Models. It is the practice with "old line" makers and dealers to offer Ladies' wheels at same price as Mens'. This is because their profits are large enough to cover extra cost of Ladies'. The construction of frame, addition of chain and mud guards and brake make the cost to manufacture several dollars greater and this extra cost the buyer must pay when wheels are sold on our plan of one small profit. Many lady riders are dispensing with brake; also chain guard. Our price for either model with chain and mud guard is \$2.50 extra; with brake \$2.00 extra; with mud guard only \$1.00 extra.

Special Proposition. We know that Seeing is Believing and we are perfectly willing to offer every chance to you for the closest inspection before you pay your money. So if you will **SEND US \$1.00** as a guarantee of good faith, we will ship our wheel securely crated complete and accompanied with our unparalleled signed Guarantee. If on receipt of wheel you find it what you expect you pay the balance of price (after deducting the \$1.00 paid) and keep it. If for any reason you do not want the wheel the Express agent will return it at our expense.

REVOLVING SHIRT BOSOM.

The latest and most startling novelty, scoring everywhere a record breaking success, and causing endless fun and roars of laughter wherever introduced. Take a look at the illustrations and see why Cholly

is so happy; it won't be necessary to tell you that he wears one of our Revolving Shirt Bosoms and not only has the laugh on the Chinaman, but on his many rivals who can't understand how he can afford a new shirt every day. It's simple and cheap when you know how, and here

it is. Our Revolving Shirt Bosoms are the only ones on the market with a high finish and open fronts—therefore the only true imitation of the regular shirt. The disc is very glossy and divided into quadrants, each having a different colored pattern of the latest design as follows: No. 1, striped pattern, stylish, modest. No. 2, Full dress shirt, plain or with motto (see cut). No. 3, Very attractive plaid, will draw attention everywhere—to be worn on race tracks, fairs, etc. No. 4, Red hot—too comical for anything, success on the stage assured—something for the "boys." The above patterns you can apply within a second and will instantly change your appearance from a clergyman to a gambler. As a novelty and rip-roaring side splitter it has no equal; as a practical article and money saver it is the greatest. Postage 2c. Price 15c. Each; Special \$1.40 Dozen.

The new "Top" Klondike"

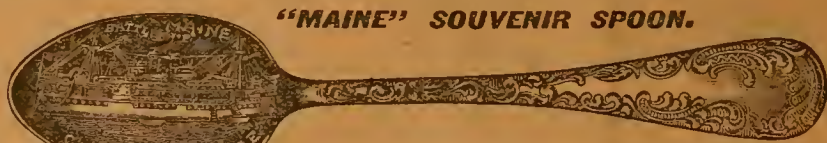

The latest in Tops and by far the best yet produced. Spins the longest, wears the longest, and is the most fascinating toy out. Made of highly ornamented stamped steel, the only one that won't crush or dent. No string required. Try it on a plate, they say it never stops going. Finished in rich Klondike Gold and brilliant colors. Postage 4c. Price 10c. Each; \$1.00 Dozen.

Novelties productive of more laughter to young or old are seldom seen. These faces are moulded in soft rubber composition colored in exact imitation of life with glass eyes which seem to change their expression with the face. Held between thumb and forefinger the face is compressed and bent one way and another producing the most startling changes in expression from serious to sad, grotesque, laughing or crying. Four different characters are made and from the set you can produce 400 variations. Postage 2c. Price 7c. Each; Set of 4, 25c.

SPIDER CATCHING FLY.

A mechanical novelty of the greatest attractiveness. A large spider made entirely of metal, nearly 4 in. long, colored and decorated in exact imitation of a real spider. Spring mechanism inside makes its legs move exactly as in life and also rapidly climb the thread and seize the poor little fly held in a boy's hand. Postage 3c. Price 9c. Each;

The Girdle is strongly made of metal; plain or oxidized silver plated, with embossed anchors and American Flags in correct colors alternating. It is without doubt the slickest thing out for Ladies' use, and is sold at a very low price. Postage 3c. Our Special Price, 48c. Each; \$4.75 Dozen.

Ignite the fuse found with each package and touch the burning end to the torch in the hand of the kneeling figure (see cut). Hold the sheet at arm's length and watch the result. A catchy war novelty and the most original yet introduced. Each package contains 10 explosions. Get a supply before your neighbor. Postage 1c. Price 10c. Package; \$1.00 Dozen.

Grand Army Souvenir Canes.

This Cane has been adopted by a number of G. A. R. Posts, and has received the endorsement of thousands of Veterans throughout the country as being an excellent souvenir and one that is serviceable at the same time. The head is made of gun metal, cannon shaped, and engraved on one side is the Grand Army badge and anchor, and, on the other, crossed swords and guns, and the years 1861 and 1865, with the centre containing a wreath and the initials G. A. R. The stick is of high grade maple in black and red stain. OUR WONDERFUL METEOR BALLOONS.

We offer something entirely new in Balloons. There is nothing quite so fascinating to old or young as watching the airy flight of a balloon, and a foreign inventor has just gotten a patent on a new idea in paper balloons. They rise from a table in the house or ascend heavenward in the open air. They excite the greatest curiosity everywhere they are shown, and thousands are now sold daily in Europe. Our foreign representative saw them in London and sent a large invoice across the Atlantic, so we could be the first to advertise them in America. Our cut above shows them in their flight, and as they burst and drop bright star-like orbs slowly to the ground. Positively no danger of any kind connected with them. In packages of 10 balloons. Postage 1c. on 20. Price 10c. package; \$1.00 Doz.

X RAY WONDER TUBE.

Price 10c. Each; \$1.06 Dozen.

The Wonder Tube is a wonderful toy which affords and creates astonishment among young and old. It shows the bones of the hand, the lead in a pencil, the hole through a pipe stem, etc. etc. It is a baffler to all, and we defy any one to give any explanation of it without taking the instrument apart, and this will disclose something beyond the power of man to reproduce. In using the Wonder Tube place it to the eye as shown in cut and look toward a window or other strong light (daylight is better than artificial light); then hold the fingers in front of the instrument, spread them apart, moving them backward and forward until the proper focus is obtained, when you will have the identical appearance shown by the Roentgen Rays. Postage 1c.

THE SURPRISE BOUQUET.

refilled without removing it from your coat. desired. We have many funny things in our stock, but nothing that equals this. Each bouquet, in a beautiful box with full printed instructions. Price, all complete, only 20 cents.

Fun for the Million and Rare Sport for the Practical Joker!—A pleasing novelty and the best practical joke of the season. This beautiful button-hole bouquet is made of artificial flowers and leaves, which so closely resemble natural flowers and leaves that not one person in a thousand would detect the difference. After placing the bouquet in your buttonhole, you call the attention of your friend to its beauty fragrance. He will very naturally step forward and smell of it, when to its utter astonishment, a fine stream of water will be thrown into his face. Where the water comes from is a mystery, as you can have your hands at your sides, in your pockets, or behind you, and not touch the bouquet in any manner. You can give one dozen or more persons a shower bath without removing the bouquet from your buttonhole, and after the water is exhausted it can be immediately refilled without removing it from your coat. Cologne can be used in place of water when desired. We have many funny things in our stock, but nothing that equals this. Each bouquet, in a beautiful box with full printed instructions. Price, all complete, only 20 cents.

THE COMICAL MIRROR.

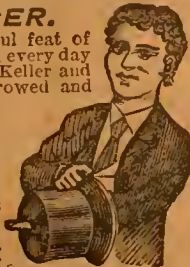

slim" view are stunners and will cure the blues every time. Send for one it will afford you lots of fun. Postage 2c. Price 6c. Each; 65c. Dozen.

A handsome convex mirror in a case suitable for carrying in the pocket. For many years the funniest and most laughable attraction in nearly every museum has been the large convex mirrors in which a person appears drawn out as long and narrow as a bean pole, or flattened down like a gridiron with a face as broad as a cellar door. This mirror produces the same effect as the large and expensive mirrors in the museums. By holding the mirror in an upright position

**TRICK FINGER.**

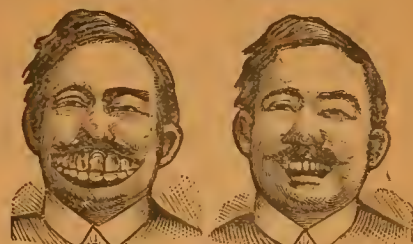

This is a most wonderful feat of prestidigitation, performed every day on the stage by men like Keller and Herrman. A hat is borrowed and after being shown to your audience to assure them that it is in perfect order, you (apparently) coolly jab your finger through the crown. The owner of course protests, but all you have to do is to keep out of his reach a moment when you can hand back the hat in perfect order. The finger consists of a piece of flesh colored rubber, moulded in perfect imitation of a fore-finger including nails, knuckles, lines and other characteristics; in the end is a needle which by a quick movement you insert in the crown.

Postage 1c. Price 6c. Each; 65c. Dozen.

**BICYCLE PUZZLE.**

positions against the rim, as shown in cut, into their proper places around the hub. This requires no end of coaxing and patient labor, as while you are endeavoring to run the last delinquent in, three or four others escape. Then to get them back to the rim to the average man is just as difficult; but there is a way to do it easily. Can you find it? Postage 2c. Price 9c. Each; 80c. Doz.

This is an up-to-date puzzle, which is not only a test of nerves and skill, but especially of ingenuity. It is a perfect miniature of a bicycle wheel, hub, spokes, rim and pneumatic rubber tire. (As a house ornament and novelty it is worth more than its price.) On each spoke is a movable metal ball, and the object is to get the balls from their

ROOSEVELT WHISTLE.

See this ghastly grin! We have them to sell. All you need to do to give yourself not only the greatest smile ever produced, but also the greatest horse-laugh, is to buy a Roosevelt Whistle.

It is a very ingenious invention from every standpoint. The mouth is so splendidly executed that it has the exact appearance of those one sees in life but once in years. It fits the face so perfectly that close inspection is necessary to see that it is not your own. The coloring and formation of lips, gums and teeth is so perfect that the illusion is complete. Attached to the back is a noise-making device which does actually "beat the band." It will give you a hilarious demoniac laugh, a roar like a sea-lion, a bark, whine or cry—anything you like, in fact. This novelty can't be beaten for a fun maker. Postage 2c.

Price 9c. Each; 90c. Doz.

RABBIT'S FOOT MASCOT.

The highest honors ever reached by man have been attributed to carrying this wonderful mascot, and while we can't guarantee a similar result in the case of every one who will carry one persistently, we are told there is a whole lot of general good luck in it, such as immunity from sickness, ill-fortune, success in love, business or any other undertaking. This is an old-time mascot, and we have gotten it up in a neat and popular form, so it will have the widest possible effect on the fortunes of the masses. Guaranteed a genuine rabbit's foot, size of cut; has eye screw anchored in the bone for attaching to watch chain if desired; also neat, nickel cap piece. Postage 1c. Price 8c. Each; Special 75c. Doz.

DARKEY SMOKER.

An attractive ornament and useful Disinfectant Holder made entirely of metal, to represent a Dude Darkey smoking his cigarette. Disinfects your room as small sticks of disinfectant are used by the smoker, which he seems to enjoy as much as the genuine article. We call him the Warmest Cogen in Town, and his appearance while smoking certainly warrants the name. Each Darkey is packed in case with 10 sticks of disinfectant. Postage 2c.

Price 9c. Each; 95c. Dozen.

THE CLIMBING MONKEY.

The great success of this year in mechanical novelties. Untold millions have been sold and if we did not know how large the country is, we would think everyone had one. It is a mechanical triumph. To the ordinary observer it may look easy to accomplish, but to make this monkey climb the string, always moving his four limbs exactly true to life and then climb down again, simply by pulling or releasing the string, involves a great deal of mechanism which the inventor spent months in perfecting. The monkey is of decorative metal and about 8 in. long. He climbs as stated above; is strongly made and will not only

give intense enjoyment, but last a lifetime. Postage 4c. Price 25c. Each; \$2.60 Doz.

1000 FUNNY FACES FOR 10 CENTS!

An ingenious combination of 12 Rubber Stamps enables you to quickly produce a face fashioned to suit your imagination. You may have it with arched eyebrows, down turned mouth and upturned nose and a sidelong glance, or with a broad laughing mouth, sad eyes and drooping nose. The prudish maiden can be compelled to wear the expansive smile or the ghastly grin of some of her neighbors, and so on with the hundreds of transpositions, each giving a new and astonishing effect. 12 perfect stamps, mounted on turned wood bases, in compartment box, with self-inking pad.

The greatest joker out. Fool your friends by offering them this glass of beer and if they drink it, they're bound to "swear off" at once. It is an exact imitation of a fresh drawn glass of Coney Island lager with a liberal collar and nothing but a close examination will make you believe it is other than the real article. Postage 2c. Price 9c. Ea.; 95c. Doz.

WILD WEST SCREECHER.

The "Screecher" is made from heavy stamped metal. It is the greatest oscillating noise-producer on earth. You can get more fun out of this Wild West Screecher than a lot of hungry monkeys. Postage 1c. Price 2c. Each; 20c. Doz.

GOBLIN SCARF PIN.

This is one of the few things that lengthens the life of the practical joker; it is estimated that each preparation of this trick adds 6 months to his allotted time. It is a gold plated pin, the design being a

man mostly head and legs. It is so curious in get up that no one can fail to notice and examine it closely as worn on your scarf. At this juncture you pinch a rubber ball concealed in your pocket, which works the hose, and the little man squirts from his pursed up lips a fine stream of "aqua pura." Postage 2c. Price 22c. Wonderful "What-Is-It."

This is the most comical surprise, and creates unbounded fun wherever introduced. The "What-Is-It" is made of beautiful ivory, and when extended to its full length measures from 3 to 4 feet, and in appearance closely resembles a long spotted reptile. It is enclosed in a neat wooden box about 5 in. long, and if you desire to create a sensation, just open this box and drop the "What-Is-It" into the hand of a friend. The effect produced will be something remarkable, especially if your friend is of a nervous temperament, or easily excited. Indeed, the "What-Is-It" with its shining eyes and red flaming tongue is something to shake the staidest nerves. If you have a boasting acquaintance who is fond of repeating stories of his coolness and bravery, you can test him thoroughly by gently dropping the "What-Is-It" into his lap, and the look of horror that overspreads his features will cause roars of laughter among those who witness the joke. Boys, girls and even "children of large growth," will find this novelty a source of rare amusement and the exceedingly low figure at which we offer it places it within the reach of all.

THE X RAY CAMERA.

This wonderful instrument dis- counts in many respects the intricacies of the elaborate and scientific devices of Roentgen and Edison. It is one of the most wonderful of modern sensations. Objects, no matter how dense or thick, placed between its lenses, are as if made of thin air, as the eye penetrates them without the slightest effort. What can be more wonderful than to place your hand, finger, or a piece of wood or heavy metal in this instrument, between the lenses, and then place it to the eye, and instead of the vision being obstructed, as would be the case with any except this instrument, it travels through and beyond the object, as if nothing were there. Of all optical inventions (and there have been a great many), this stands alone as the most wonderful and incomprehensible. The Camera contains two sets of compound lenses, mounted in a handsome telescope case, $3\frac{1}{4}$ inches long. It is being sold by the million in the largest cities at 25 cents. Consistent with our usual custom, we cut the price almost in half and place the wonder within reach of all for a trifle. Postage 2c. Immense Sale

MAGIC SPOTS.

This is the most interesting, magnetic and scientific puzzle of the age. It is having an enormous sale in all the principal cities of the world and is creating more comments than any puzzle since "Pigs in Clover." Magic Spots is so different from the usual order of puzzles that groups of men, women and children are often found watching the sensational and magnetic movements of the spots. The puzzle comprises a neat round wooden box with

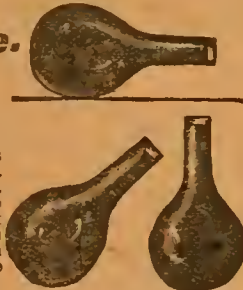

cardboard base, a German horseshoe magnet and a number of small flat lead spots. The object is to get the Magic Spots directly over the red dots, with the aid of the magnet, from the outside of box. To move them is very easy as the horseshoe is strongly magnetized and attracts the spots instantly, but to place one on each spot requires great nerve and skill, and the length of time it takes to do it depends entirely on the quickness of your hand. It has often been done in a minute and then again has taken over an hour before all were placed; but the queer antics performed by the little spots so engrosses your attention that you hardly notice the passing of time. There is more enjoyment to be had from this puzzle than any other ever invented; you will be mystified at its wonderful magnetic influences and spend many hours in trying to solve it. Postage 1c. As the bottle is turned out of a solid piece of wood it cannot be broken. Great fun can be had at an evening party or elsewhere, with this trick, which will bear repeating any number of times. PRAIRIE WHISTLE.

This is one of the most wonderful productions of the artisan's skill, and its effects are simply wonderful. It is a little instrument which is entirely concealed in the month when in use, it being impossible for the closest observer to discover that the person using it has anything unusual in his mouth at all. It is composed of a double semi-circular metallic ring, which encloses and supports the vibratory tissues or sound producer. Attached to the ring is also a diaphragm or retractor, the whole instrument being only about half an inch in length and less than an inch in diameter. All the parts are made by costly machinery, designed expressly for the purpose, and every part is finished in the most perfect and substantial manner, will last a life-time. With it any person can imitate in the most perfect manner the singing of every bird in the forest, the cackling of a hen, the squeal of a pig, the grunt of a hog, the neighing of a horse, the whistling of a quail, the quacking of a duck, etc. For the use of the hunter, they are invaluable, as an animal or bird can be so imitated as to call them at once within range. All the various songs of the mocking bird, canary, and other choice singers can be given so naturally that the most expert listener cannot detect the difference. You can talk as well with it in your month as without it. This is the famous genuine double throat or ventriloquist's whistle. Please look in other catalogues and see what awful prices they charge. Postage 1c. Price 3c. Each; 32c. Doz.

MAGIC TRICK WHISTLE.

Did you ever pick up a whistle without blowing it to see how loud it was? Did anyone? No! Whistles are to be blown and everyone knows it. So when they see one they blow, and blow hard. This whistle is just as inviting as any your guileless friend will be sure to blow if you leave it in his way, and what does he get? Instead of noise, flour! and he gets a lot of it: in his eyes, nose, hair; on his black suit and shirt front. He gets filled with it, and looks like a ghost or a grist-miller, when it is over and he emerges from the deluge. Postage 1c. Price 9c. Each; 94c. Doz.

TIMBUCTOO SCARF PIN.

This was all the go at the World's Fair in Chicago. The people almost fought to get them. The manufacturer could not make them half fast enough. LIGHTNING TRICK BOX.

A Startling and Pleasing Illusion:—"The ways of the world are devious," says Matthew Arnold, but the ways of the Lightning Trick Box, when properly handled, are admitted to be puzzling and uncertain. Replace the lid, when you can solemnly assure your friends that you can instantly empty the box in their presence without opening it. Pharaoh's Serpent's Eggs.

A wonderful and startling novelty! Our illustration gives a very correct idea of this scientific wonder, which has become so famous since its introduction in America. "Pharaoh's Serpents" are produced from a small egg, no larger than a pea. Place one of them on a plate, touch fire to it with a common match, and instantly a large serpent, a yard or more in length, slowly uncoils itself from the burning egg. Each serpent assumes a different position. One will appear to be gliding over the ground, with head erect; another will coil itself up, while another will stretch out lazily. Each movement is natural as life. After the egg stops burning the serpent hardens and may be kept as a curiosity. Twelve eggs in wood box. Postage 1c.

WARBLER

SCARF PIN.

"This is a BIRD!" not only in the worn vernacular, but in fact. It is, furthermore, a live bird! At least it has two of the most necessary attributes of one, namely, it sings and flutters its tail. It is beautifully designed and perfectly made by one of the country's leading manufacturing jewelers; elegantly plated in 14-K. gold. Its detail is so fine that each particular feature is brought up by the perfectly engraved dies. This is important, for to get one's attention you must wear something odd, striking and pretty. Your friends will never fail to notice the bird. Then, while they are examining it, you secretly press the rubber bulb concealed in your vest pocket and to the astonishment of all the bird, till then quiet and inanimate, raises its tail, which is of beautiful real feathers, and begins to sing; and as your friend becomes more interested and wondering you vary his singing to suit yourself, from the mild chirrup of a meadow lark to the shrill plaint of a whippoorwill. Imagine the consternation caused by seeing such a performance of an innocent and beautiful Scarf Pin. Last year we were obliged to sell this at 70c. Finding it so popular we contracted for a large lot, and have reduced the price to but little over one-third this amount. It is complete with all fixtures, as shown in cut, including ball and about 2 feet of tube. If your fancy pleases you may use water in place of air, and instead of filling the atmosphere with music you fill it with water and spray. A great fun-maker. Get It. Post age 2c. Reduced Price 30c. Each; \$3.10 Doz.

THE SKIRT DANCER PIN.
THE LATEST NOVELTY.

THE LATEST NOVELTY.

To be Worn in either the Scarf or Lapel
of Coat—Kicks like the Original Article.
An Attractive Pin.

There is a pneumatic arrangement within the figure which is concealed by means of a concealed rubber tube with a small rubber ball carried in the pocket of the wearer. Like Lolie Fuller, you have to reach into your pocket to see her dance. It is only necessary to apply a little pressure to the bulb in the pocket, and the skirt dancer's pedal extremity will disappear in the air with precision enough to destroy a tile at every kick. You press the bulb, she "does a turn." The chief advantage of the small silver Lolie over the other kind lies in the fact that she is perfectly obedient to the stage manager's wishes, and all her kicking is confined to her own line of business. Postage 2c.

THE MAGIC BOX.

A beautiful nickel-plated box containing a heavy wheel centered on a shaft, the top end of which is magnetized and projects through top of box; the wheel is set in motion by a lever at side of box, and on account of its weight it runs a long time. The magnetized shaft end of course attracts metal, and when in motion anything placed again it will be kept in constant action, taking courses depending on the shape of the metal applied. Cut shows two figures set on a metal base of irregular shape, which moves the figures exactly as if they were waltzing and reverses them at intervals. With each box comes an assortment of a dozen different figures in beautiful colors, also the same number of metal fixtures of almost every conceivable shape, making the variety of permutations this box will bring out almost endless. It is impossible to adequately describe it. You will be a hundred times satisfied if you send for one. Postage 5c. Price 40c. Ea. \$6.00 Doz.

This feat they find it impossi-ble to accomplish, and return it to the performer, who instantly and easily removes the ring to the wonderment of all. Postage 2c. Reduced Price 30c. Each.

THE WONDERFUL MONEY MAKER.

THE MONEY QUESTION
SETTLED
AT LAST.

While "Gold Bugs" and "Silver Cranks" are trying to settle their differences on the money question this gentleman says nothing and saws wood. The illustration shows him in his first convulsion of surprise at the result of simply turning the crank. As he turns, the white paper goes in and a crisp new \$5.00 note comes out, and when the last bit of paper disappears between the calendars of the machine the bill drops. A hatful of the same kind follows as you feed in more paper. Transmutation of metals is not in it with the wonderful money maker, as you (apparently) make money with it out of paper costing but 4c. a pound. However it is NOT a counterfeiting machine but the sleekest fooler of the credulous ever devised by ingenious man. Guaranteed to do as claimed above. Substantially made with metal frame on fancy wood base, provided with a supply of blank paper and instructions enabling anyone to work it to perfection. KAZOO, the Musical Wonder.

GREAT FUN FOR THE BOYS! With this wonderful instrument you can play any tune, imitate birds and animals, bag-pipes, Punch and Judy, etc., etc. The Kazoo is the only musical instrument that any one can play at a moment's notice, without instruction. When used by minstrel and specialty artists, quartettes or choruses, it invariably receives repeated encores. Furnishes good dancing music for excursions, picnics, etc. Superior to anything else for clubs, street parades, etc. Used as a mouth-piece on brass or tin horns; a good band can be organized with little practice, as the keys require no fingering.

FAVORABLE NOTICES FROM THE PRESS.

"The popularity of the kazoo as a musical instrument is attested by the fact that kazoo quartettes and choruses are being generally introduced at entertainments. The kazoo quartette at the City Hall entertainment recently was recalled six times, and the kazoo chorus at the Genesee Normal School entertainment received 4 encores."—"Post Express," Rochester, N. Y.

"A portion of the afternoon's pleasure and amusement was due in no small degree to a small musical instrument called the 'kazoo,' with which the musically inclined gentlemen of the party performed in a creditable manner the popular songs of the day. It was this little instrument that furnished music for the march to the hotel, and if one might judge by the interest taken in it by the guests on the piazza, it fully sustains the reputation of novelty given it by its inventor."—"Boston Journal." PLANCHETTE, JR.

"Aerial spirits by great Jove designed to be on earth the guardians of mankind; invisible to mortal eyes they go, and mark our actions, good or bad, below." Since the days of the Fox family nothing has appeared which has excited scientific inquiry into the possibilities of actual intercourse between the seen and unseen as did, and still does, the magical, and to some minds the uncanny, Planchette. Under its guidance questions have been answered and tales told so bordering upon the marvelous that one's intellect becomes confused, and for the moment at least it seems possible to enter the secrets of the spirit world. Scientific journals and societies admit that there is an indefinable "something" which controls the actions of this instrument to such an extent that its answers are proved by actual knowledge to have been true. Professor Tyndall frankly says, after the most careful examination, that "the phenomena are inexplicable by any known laws." The present generation have only an indistinct recollection of the days of 1867, when Planchette was read, studied and discussed about nearly every fireside. The instrument is illustrated above, and consists of a movable table bearing a well-sharpened lead pencil in its index point. For an evening's entertaining Planchette proves a diversion both interesting and marvelous, especially as it refuses to act while under certain individuals' touch, and again readily becomes alive when another investigator presses his fingertips upon its responsive mechanism. Planchette Jr. is the same in principle as the larger ones, but measures only 5 1/2 inches. Polished hardwood table. Postage 5c. Price 25c. Each; \$2.45 Doz.

This new mechanical bank is $3\frac{1}{2}$ inches square, height in front $5\frac{1}{2}$ inches. It is made of sheet metal, an exact imitation of an old time "quarters befo'de wah." When a penny or nickel is dropped in, the clockwork starts the machinery, the player will "pick de ole banjo" the other darkey dances a genuine breakdown, keeping perfect time, and with a great variety of amusing steps. 600 distinct operations are required to make each bank, which contains over 60 separate pieces. With one of these banks you can do a "regular land office business," why? because every one that comes along will want to see the performance, and the talent does not accommodate unless paid, consequently in goes the admission price, every time. The bottom is a coin safe into which all the money drops and remains there until removed by the treasurer of the bank. The metal door with safety key, insuring this. It is wound up from the back. Artistically designed, stamped in relief, and hand painted, making it handsome enough for the parlor table, and sure to attract attention, and make money. Useful, funny and you cannot buy anything that will please the little folks better, and amuse the older. Postage 17c. Price 98c. Each; \$11.00 Doz.

"PAPA" AND "MAMA."

This is a small box about 3 in. long, and it is full of condensed and concentrated fun. The ends are of gauze, giving the appearance of a cage, and the noises that come from it will make the average mortal think there is something very much alive inside. As a matter of fact it contains a good-sized bellows, and when you release a secret spring the thing yells out in a loud voice like a baby's or a parrot's "Mama!" or "Papa!" At an evening party or dinner table you can set the crowd crazy by operating it in your pocket. Postage 3c. Latest Price 18c. Ea.; \$1.98 Dozen.

weight turns at high speed, and runs a great while. Notice our cut. Full directions and pedestal with each. Postage 4c. Price 12c. Each. \$1.20 Doz.

This top has been for years a "sticker" for scientists and even the most learned cannot satisfactorily account for the wonderful feats it performs in apparently defiance of all laws of gravitation and motion. Our cut shows its capabilities better than we can describe them. It is composed of a neatly decorated wheel of heavy metal on a bright steel axle which is perfectly pivoted inside a bright steel outer ring. The wheel, owing to perfection of its bearings and its

The Telescope Vocophone.

Here is a funny thing; it is figuratively and actually a yard of fun and is capable of being

concentrated into very small compass. Suppressed by the Coney Island authorities, because it made so much noise and for this and other reasons now wanted by every one. When collapsed as shown in small cut, it occupies a box 4 in. square; when extended, it is about 3 feet long with a 4-inch mouth; composed of 12 tapered sections. Its construction gives the same astonishing effects in magnifying the power of the voice as the recently invented Microphone by which ordinary tone is increased to that of a giant and carried a mile and over with ease. With it you can speak to the mountain-tops, valleys and forests from your doorsteps; call the folks to dinner from the back lot a mile away and in fact hold long distance conversation with your neighbors in general. Furthermore, each instrument is fitted with a Patent Vocophone mouth-piece which gives a peculiar weird and penetrating quality to the tone and enables you to exactly reproduce the bellowing of a bull, the roaring of a lion, squeal of a pig, crowing of a rooster—down to the chirrup of a dicky-bird. It will imitate perfectly any band instrument from piccolo to bass horn or opera singer from high soprano to basso profundo with all the usual "agony". All told we have not in years offered anything with more merit for amusement and utility than this Telescope Vocophone. Made of special fibre tubing coated with silver and gold leaf enameled mouth-piece with delicate reed mechanism, not affected by dampness or use. Get one now and let the fun begin! Postage 9c. Price 50c. Each; \$4.95 Doz.

Pocket Watch Purse.

Postage 1c. Price 2c. Each; 20c. Doz.

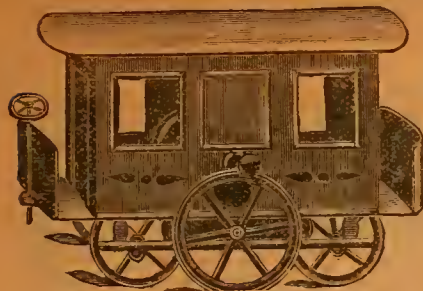

WHISTLING FIG.

Mechanical Flying Bird.

Since the wonderful climbing monkey was produced nothing so attractive in this line has been produced, and this is even better, as it has more action and is more attractive. As the string is pulled, as shown in cut, the bird flaps its wings with perfect naturalness and really appears (the string being small and almost invisible) to mount up on the air alone to the boy's other hand. The bird is beautifully gotten up in lithographed metal in several colors showing its plumage as in life; measures 7 inches from tail to beak; its wings have a duplex action, each having a skeleton mechanism which works from machinery inside the bird. TIGHT-ROPE WALKER.

Here is the "Queen of the Air," Miss Blondin, a beautiful young lady that really walks along a real rope suspended in the air, without any assistance from anyone. She always creates great laughter and applause. The figure is perfectly formed and wears a Bloomer costume—blue skirt, and red and blue trimmed waist, with bare arms, and legs in tights. By an ingenious mechanism she is made to stand on rope, and is ready to walk the moment you place her on the rope. By adding extra rope she will walk from one room to another, or the whole length of the house without taking her down. This a wonderfully ingenious invention, and Lady Blondin walks just like a real tight-rope walker, her legs and feet moving as if in life. Invalid's Home Healer.

Do you suffer from RHEUMATISM, GOUT, NEURALGIA, NUMBNESS, NERVOUS TROUBLES, WEAKNESS or BLOOD DISORDERS of any kind?

ELECTRICITY is the BEST KNOWN CURE for all these ailments and many others, it is ALWAYS BENEFICIAL and NEVER HARMFUL no matter what the disease or trouble may be.

Ask any authority, "Is Electricity Beneficial for Muscular and Nervous Affections?" The answer will invariably be "Yea."

There are Millions this Dynamo will cure. Many are squandering, not SINGLE DOLLARS, but tens, hundreds, and even thousands with Doctors in the vain search for relief. We know how they are buying quack medicines, wearing magnetic belts and other useless devices of avaricious so-called specialists; how they are being scared, bled and fleeced by charlatans and advertising fakes.

Dr. Cutten's Medical Dynamo is the latest and most marvelous invention of the celebrated Dr. E. B. Cutten, one of America's foremost and most successful specialists in modern sciences. Being a Medical Doctor of wide experience and an expert in Electro Chemistry, he has, after long and continuous study of the various apparatus, now employed by the Medical World, been successful in evolving a machine at once unique and scientific, yet most adaptable and efficacious as a means of distributing the electrical currents through the human system in the most beneficial manner. From the large medical coils, magnetic machines and other highly expensive and complicated apparatus ordinarily used for electrical treatment Dr. Cutten has eliminated all the faults and magnified many times the virtues in the invention of this simple little Dynamo.

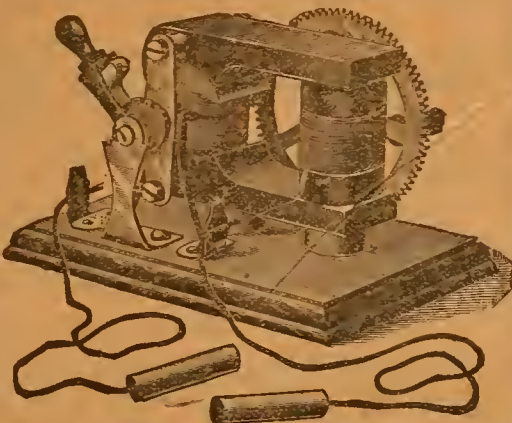

This Home Health Giver is wonderful on account of its size and low cost, yet generating the effective DIRECT CURRENT so essential for the best curative results. The Dynamo requires neither doctors' prescriptions nor expert handler. No chemicals necessary and is always ready for instant use.

The current can be exactly gauged by means of the patent switch, developing as it does a continuous volume, without shock or irritation and suitable for the most delicate organism or strong enough to overpower a giant.

The Dynamo comprises permanent field magnet and armature connected with multiplying gear, giving great speed with slow turning, switch for controlling current and conductor cords attached to electrodes which may be applied to any part of the body. Mounted on polished wood base. Dr. Cutten's Treatise, a work of great value, giving explicit instructions for home electrical treatment free with each dynamo.

HELLO! DO YOU WANT A TELEPHONE?

Since the Bell patents have expired the public have awakened to the fact that Telephones are wonderful savers of time and labor. Instead of going to see your man, you stay where you are and talk with him. It has always been our study to fix on the best things of this earth and if possible place them within the reach of all the best people, i. e., the masses—the workers. The difference between "luxuries" and "necessities" is usually represented by monopoly and high price. Many a device just as much a necessity as a pen or a broom is made a luxury by patents and consequent high price. So we have gotten out this popular edition of the Telephone. Each set consists of two black enameled Receivers and Transmitters, perfect reproductions in shape, appearance and general construction of the Bell instruments. Their acoustic properties

are very powerful, owing to their construction on a new model, giving a clear delivery of the slightest sound at great distance. They carry with distinctness a whisper 300 to 500 feet. For short connections and indoor lines they are much better than \$100 instruments. For use in place of speaking tubes,

for connecting your house with barn, factory, office or other point on a farm, or with your neighbor or postoffice station, this outfit will prove entirely satisfactory and result in sales of many more. The object lenses are of fine quality and high power, 1 inch across; sections are of highly-polished seamless brass tubing, fitted at each joint with milled and threaded brass caps, so that all may be readily taken apart. The workmanship is of the most perfect throughout. Our prices are far below the market, as we import direct in large lots. Postage 3c.

FRENCH ACHROMATIC TELESCOPES.

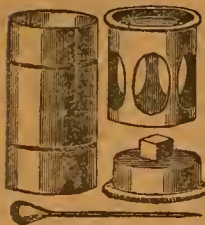

NO. 1

This useful and beautiful instrument has five lenses, of the best French manufacture. The object lenses are achromatic, that is, convex and concave. High power achromatic telescopes have heretofore sold at prices placing them almost beyond the reach of persons of moderate means. The telescope we now offer is just what the people want, a real philosophical instrument at a low price. It is strongly made and cannot get out of order, but will last a lifetime. The slides and mountings are made of brass, highly polished, the telescope tubes fitting closely into each other. Safety caps of polished brass cover the exposed ends of the instrument, keeping out dampness, and dust when not in use. The main tube or body of the telescope is covered with handsome French morocco, making it altogether a most excellent instrument. The length of the telescope when extended is 16½ inches; when closed, 6 inches; diameter, 1¼ inches. Each telescope is furnished with a strong case. Postage 13c. Price \$2.00 Each.

NO. 2 FRENCH ACHROMATIC TELESCOPE.

For those desiring a still larger and more powerful telescope we have one which measures, when extended, 25¼ inches; when closed, 9¼ inches; diameter, 1¾ inches. COMBINATION MICROSCOPE.

It is specially imported from France, and readily sells for one dollar at retail. The cylindrical case is manufactured from highly polished brass, while there are two separate lenses—one at each end of the microscope. The larger glass is a convex magnifier, adapted for examining insects of various kinds, the surface of the skin, the hair, fur or any small articles. It will magnify the hairs on the hands or arms till they resemble large ropes, and it is a most interesting companion. The other lens is exceedingly powerful, and will clearly delineate every small object entirely invisible to the naked eye, such as the animalcules in a drop of water, fishes, feathers and the minutest insects. Thousands of living animalcules can be seen in a single drop of stagnant water. An insect eye is a very beautiful object when seen through this microscope. It is invaluable in detecting adulterations in food, such as flour, tea, coffee, sugar, spices, milk and the fatal *trichina spiralis* or pork worm. Postage 2c. Special Price 38c. Each; \$2.75 Doz.

HUMPHREYS' MAGNETIC RING.

This is a well-known ring which differs from others in not being continuous but broken, as shown in cut, and therefore having a positive and negative pole, the same as any magnet. Its strength and practicability may be tested with a compass or any article of steel. The record of marvellous cures traceable to this ring probably exceeds that of any other. A ring which is closed or joined together cannot completely distribute magnetism, as is well known by any scientific person, that if there is any current it will keep revolving around the circle and will not depart from itself, thus having no effect. Not so with Professor Humphreys' batteries, for as the current comes to the end of the circle the electricity enters the body at one point and is taken up again at the other, after passing through the body, forming a complete circulation. Regular price \$2.00. Postage 1c. Our Special Price 75c. Each.

OUR MAGNETODE ELECTRIC BELT.

The only humbug about Electric Belts in general is the abnormal price at which they are sold. Our contract does not allow us to use his name in connection with this Belt, but every one is sold under his absolute guarantee of quality, and, further, that it will effect cures as quickly and radically as any other Belt of all such diseases as Rheumatism, Nervousness, Kidney Diseases, Stomach, Liver and Bowel Troubles, Pains, Paralysis and Weaknesses. It is provided with duplex permanent magnets, which contact directly with body, and electrodes encircling the body and imparting a steady volume of electricity necessary to radical cure. COLUMBIAN ELECTRIC GENERATOR, OR DYNAMO.

This is a wonderful little machine in the line of Electrical goods. Up to date the only portable Electric Generator has been a chemical battery, called Medical Coils; This machine is entirely mechanical and generates a very powerful current depending on the speed with which it is run. Attached to a sewing machine, and run from the large driving wheel it will generate sufficient a current to throw a man down instantly, and for all medical purposes, it gives ample current by hand-power. By belting from the large pulley which is 6 inches across to small on shaft, a speed of several hundred revolutions of Armature per minute is easily attained. This Dynamo is perfectly made and is good for unlimited use. It uses no chemicals, only requiring power. A great instructor for the young and something by which an ingenious boy may demonstrate nearly all of the various powers of electricity by adapting it to running motors, experimenting and furnishing amusement to company. As a remedy for various ills, electricity is well-known and this dynamo is destined to supersede all other forms of small generators as it has more power than a \$25.00 chemical generator, costs nothing to run and lasts a life-time. Cannot be mailed.

Magic Scholar's Companion.

This Combination secures its contents by means of a Real Combination Lock, similar to those in use on burglar and fire proof safes, and yet so simple that any child knowing

the proper combination can readily operate it, but one scholar cannot open another's companion, as hundreds are made without any two combinations being alike. The combination is handsomely finished, and is divided into neat compartments for pencils, pens, chalk, sponge, etc. Postage 6c. New Price 9c. Each; 85c. Doz.

HANDY GUM PAPER.

One of our exclusive specialties, not found in stores yet almost indispensable when once used; a roll of specially fine transparent paper, coated with the highest quality adhesive gum. Almost equal to court plaster in strength and utility. The roll is 3/4 inch wide and as thick and is provided with a neat device for cutting the paper as desired (See Cut). For mending torn bills, sheet music, books and papers it is the only thing as it is superior to court plaster for cuts and abrasions. Try it and you will never do without it. Postage 1c. Price 8c. roll; 60c. Doz.

The Ingersoll Fountain Pen.

This is a pen of our own manufacture, and in it we furnish another example of what producing quantities combined with business ability will do. It is in no sense a cheap pen. The barrel is of specially made hard rubber, accurately turned and fitted, and hand engraved in beautiful design; this engraving is not of an ordinary machine or mould made kind, but spirally waved, giving an entirely new and elegant effect. It has a new patent under-feed which has never been equalled for non-leaking quality. The pen is No. 2 size and of extra good weight, and made of 14-karat gold by leading gold pen makers; it has a diamond point, and gives the best results of any pen made, as it is made with greatest care by experienced men, and combines flexibility with stability. The ink flow is automatic, and it will never drip nor skip. We guarantee it in every respect; and further, that it is the equal in quality and appearance of any \$1.50 pen sold. By making larger quantities than any other pen maker, and saving all middle profits, we can sell "THE INGERSOLL" at the price we have put on it. Complete in box, with filler. Postage 2c. Price only 85c. Each; \$8.40 Doz.

The Crystal Pen.

This is a big improvement in Glass Pens. They are hollow down through to the point, and the action of the air allows the ink to flow freely along the ribbed nib. They are made of the best black glass and one will last a lifetime. We guarantee we will write as well, clearly and easily as the best steel pen, and a great deal better than ordinary pens. The pen is grooved so that it will hold full supply of ink, while it has a very fine point, with which writing can be done on any kind of paper. The Glass Pen does not corrode nor wear out like steel pens, but will last almost a lifetime. The pen holder is of perfectly round smooth and polished glass of standard length to suit the hand. The Glass Pen is not an experiment, but a valuable, practical article coming into general use. If you try one you will never be without it, they are splendid to draw a line along the ruler for they will not blot. The price surely ought to induce you to send for one or more to try. They are great for children to draw maps and pictures with. Each pen is enclosed in a strong case. Postage 1c. Price 5c. Each in wood case; 35c. Doz.; \$3.60 Gross in Bulk.

Our PEERLESS ALUMINUM FOUNTAIN PEN.

We here offer one of our latest and most popular products. This pen is the result of a recent discovery of the wonderful qualities of aluminum for pen manufacture. A proper alloy of this metal with steel gives a maximum of elasticity and ductility; and what is more important, it entirely prevents corrosion and rust, so common in steel and all composition pens. These pens are especially made for us; large and substantial, holding a large amount of ink, and suited to all medium hands. This pen is much preferred to gold by a large class of writers, and are nearly as durable; with an occasional wiping they will last for years. Extra pens may be had at 10c. each. The Peerless is provided with a new top feed, which gives the best results in durability and good work. It will withstand all the effects of acids in inks, and produce uniformly good work without leakage or failure of any sort. Furnished with a regular full-sized and perfectly made and finished hard-rubber case. Engraved in finest manner. Similar pens in ordinary cheap plain barrel sell in stores at 50 and 75 cents.

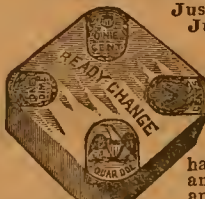

Our Reduced Price, Complete in Box, with Filler, 25c. Each; \$2.95 Doz.

IDEAL PANTS HANGER AND STRETCHER COMBINED.

PATENT APPLIED FOR.

It is a mistaken idea people have, that a stretcher removes baggy knees from pants, not considering that baggy knees come from neglecting the pants, and when once neglected nothing but sponging will do the work, this only for one time, no more.

Pants require more care than a coat; only hanging upside down will preserve their shape, and prevent baggy knees. Pants of every day wear being in the Ideal Hanger through the night while you are resting, will look just as shapely as if just got from the tailor, if you hang them every time when retiring. This can be done in one moment's time, and the same in taking them out, without disturbing suspenders or contents of pockets. Does not force your pants; does not make them longer; simply stretches the pants by their own weight, which you cannot do by any other kind of stretcher. This Ideal Hanger and Stretcher can be taken in your trunk, satchel or pocket, not taking up much room.

Society Self-Threading Needles.

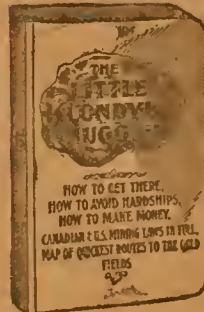

Great modern inventions; needles that may be threaded without looking; cut at left shows them magnified; the other cut shows how they are threaded; they cost little more than an ordinary needle and every one will save the price of a paper a dozen times in time saved not to mention saving in eye-wear and annoyance. There is more dyspepsia cure in "Drummer's Yarns" than in tons of chewing gum.—Dr. L. S. STONE.

DRUMMER'S YARNS

ALL

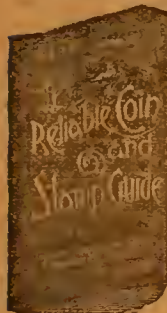

NEW

Whenever a humorous situation occurs in a Drummer's variegated experience, or is suggested to his vivid imagination, it is carefully stowed away in his memory grip, to be brought out fresh and sparkling for the delectation of his fun-loving associates. The funnyman of the stage is "not in it" with the "Knight of the Grip." Last year's chestnuts don't go with the Drummer. He can give to the end-man in a Minstrel show the big and the little Casino and beat him nineteen points in twenty-one. The Drummer who cannot tell a New Funny Story upon the slightest provocation has no standing in the Guild. Throw two or more of them together in a Pullman car, and the exchange of Witty Yarns is as certain as day after night. The grinning porter forgets his tip, and the hungry listener his dinner. Each is in duty bound to surpass the other, and when once started in his favorite diversion, nothing will stop story-telling Drummer but a stroke of lightning or an order. **HERE THEY ARE!** Not all of them, but the very latest and freshest and wittiest. Caught on the fly by one of the fraternity, who is known from Maine to California, who tells only the best stories himself, and never swaps for a spurious article. They will not set a broken neck, nor protect you against fire, but they will cure most of the ills that visit suffering humanity. Then laugh and grow fat! If you cannot laugh at these stories, we give you up. Your case is a very bad one. Consult your other doctor at once. The many funny engravings are made to fit the Yarns, and some of them would make a horse laugh. This great book contains 112 large pages, size 7x10 inches, with handsome cover. Price 25 cents, postpaid.

THE RELIABLE COIN AND STAMP GUIDE.

Few people have any idea of the value of old, rare, odd and obsolete coins and stamps. Did you know that a Boston shoemaker sold a collection of coins for **TWENTY THOUSAND DOLLARS**? Did you know that some rare American stamps are worth as high as **SIX HUNDRED DOLLARS EACH**? It is a fact that the rare 1853 quarter is worth \$300.00, the 1853 quarter is worth \$25.00, the 1854 silver dollar is worth \$300.00, half cents made between 1840 and 1850 are worth \$3.00 to \$5.00 each, the large old style copper cents are worth as high as \$4.00 each. Some issues of Continental and Confederate bills are rare and valuable as well as certain pieces of fractional currency or "script." Besides these, many rarities in half cents, cents, three-cent pieces, half dimes, dimes, twenty-cent pieces, quarters, half dollars and dollars are worth a big premium over face value. **The Reliable Coin and Stamp Guide** gives accurate information, and you may depend upon it.

While a great many people collect old coins, there is more demand for rare postage and revenue stamps, and some comparatively recent stamps are now scarce. Collections of stamps often sell as high as **A THOUSAND DOLLARS**. revenue stamps from patent medicine bottles, match wrappers, old documents, etc., are in great demand, and are worth from **10 CENTS TO \$10.00 A PIECE**. Look over your old letters in the garret and elsewhere; perhaps you may find some rare things. This book gives all particulars, with prices, pictures, etc., and gives addresses of reliable firms who buy them for **SPOT CASH**. No matter if you handle but ten cents a day, you should have this book. **EVERYBODY NEEDS IT.**

It is worth its weight in gold to any wide-awake person. Boys and girls should read for it and explore attics and cellars in search of old letters, which may contain rare stamps. Who knows? A small fortune may be in your very midst. Do not write for particulars; do not ask questions; do not send us the coins or stamps, but get the book. It tells all, where they are, what they look like, and why they are rare. This book gives reliable figures only; no fictitious dates or values whatever. It is issued under the supervision and authority of the greatest stamp and coin collector and dealer in North America. **SATISFACTION GUARANTEED.**

"TIME IS MONEY."

THE EXPERT CALCULATOR.

A complete compendium of short-cuts in figures and useful business information.

EXAMPLE.

To Multiply a number of two figures by itself, or to square a number of two figures; say square 84: Make the multiplier the nearest round number (80) and increase the multiplicand by the same amount as you have reduced the multiplier (84 + 4 = 88), multiply the two together and add the square of the number added and subtracted (4); we have therefore 88 x 80 + (4 x 4) + 7040 + 16 = 7056. — All this can be done mentally, which is its great advantage.

This is contained in the EXPERT CALCULATOR, a book just published which gives many methods of shortening the work. In Addition, Multiplication, Percentage (General), Interest, Marking, Selling, Prices, Averaging Accounts, Price Marking, Brick and Masonry Measurement, Measurement of Live Cattle, AMUSING AND TRICK ARITHMETIC, etc., etc. 200 pages, size 5 x 2 1/2, bound in leather and indexed. **PRICE, 40 Cts.**

The Art of Ventriloquism.

This great book was written by the celebrated Frederic Maccabe, one of the most famous of the world's ventriloquists. Mr. Maccabe here clearly shows that ventriloquism is not a natural gift, but that by training and practice it may be acquired by any one, and it is certainly an accomplishment well worth cultivating, for nothing will so amuse and mystify a social gathering as the feats of the ventriloquist. He appears to be a man of a dozen voices. In his natural tone of voice he asks a question, and the answer appears to come from the depths of the chimney in the weak accents of a little child. Again, we hear the voice of an old man appearing to proceed from the roof of the building, the distant barking of a dog, etc., etc. These wonderful imitations are performed without the slightest movement of the lips, greatly to the astonishment of the audience. Would you not like to acquire this amusing and mystifying accomplishment? You can do so easily and readily by studying the directions contained in this book, which is the best and most complete instructor in the art of ventriloquism ever published. It is a book of 64 large, double-column pages, bound in attractive colored paper covers, and will be sent by mail post-paid upon receipt of only Ten Cents.

Up-to-Date Love Letters.

This is not a school book that tries to tell those who are coaxed how to write love letters. It is a spicy, intensely interesting story about a beautiful young lady and a handsome young man, who met each other in Chicago, and fell desperately in love. The girl lived in Chicago and the lover in New York, to which place he returned shortly after the meeting. Of course they corresponded a great deal. They wrote back and forth; told one another of their great love, and their secrets. After a while they became jealous of each other, and they quarreled in their letters, but finally "made up." He sent her presents, and she wrote back the nicest letters you ever read. All of this correspondence is made public in this book, and never before were such interesting letters published. The book tells how to express ardent love; how to express joy, hatred, jealousy, passion; how to acknowledge a gift; how to make a deep impression on the one you love! It will strike a tender chord in the heart of any one who has ever loved. Love Letters is handsomely bound in cloth and beautifully illustrated. 170 pages. Flexible gilt cloth. Postpaid 50c.

We do not guarantee the safe delivery of goods sent by mail. We pack properly and deliver to post office; there our responsibility ceases. In case of loss we do all in our power to recover the package. There is probably not a loss of one per cent on mail packages. Valuable packages may be registered for 8 cents.

AGENTS. Many people write us for agents and trade prices on our goods. To such we reply that this book quotes our only prices in plain figures. Agents and storekeepers can on the basis of dozen prices quoted herein turn our goods over at good margins. It is true they cannot sell at our prices as a rule but neither can their competitors. We call special attention to dozen prices having the word "special" before them. We want agents and offer inducements right in this book for live men.

that the student has no knowledge, and follows a line which must result in perfection in performing on whatever instrument is undertaken. Each is a complete compendium of musical terms, and contains short methods copyrighted by Prof Ryan; also many choice selections properly graded for the student. For the following instruments:

BANJO, GUITAR, VIOLIN, MANDOLIN, ACCORDEON, HARMONICA, PIANO, FLUTE, FIFE.

THE GREAT PHONOGRAM.

It Talks and Sings!

The most extraordinary and marvelous musical instrument of recent years. A clever head backed by a vast amount of money has contrived and constructed a scientific instrument, operated on simple but accurate mechanical principles, which reproduces the latest popular songs, speeches, stories, music by bands, orchestras, &c., in a clear and distinct manner. Its music, both instrumental and vocal, is reproduced with all the beautiful expressions and melody as only the finest bands, orchestras and singers can render them. For home amusement, it has no equal; a child can operate it as well as any one; as there are no complicated parts to get out of order. The music is transmitted to the ear from the regular "Berliner" records, which are made of vulcanized hard rubber, practically indestructible, and can be used over and over again without injuring them. The number of selections you can listen to is unlimited, we have over 1000 in stock at present and are daily adding the latest compositions. Each machine comes in a strong, substantial case with black leatherette cover, size 8x12x3 inches, with one record, hearing tubes for two persons, extra needle points and a complete list of records we have on hand. If you fail to get a Phonogram you throw away a chance of buying a talking machine at \$2.50 which will work as satisfactorily as the \$100.00 ones. Weight 4 pounds.

American Roller Organ.

The American Roller Organ does not belong to the large class of instruments (most of them mere toys) which depend upon a perforated sheet of paper, frail and easily torn, to produce their music. This musical marvel EMPLOYS NO PAPER; but its music is obtained from a ROLLER, furnished with pins similar to those of a music box. These pins operate upon valve keys made of hard steel; the roller being driven by suitable gearing, which also works the bellows. All the working parts of the instrument are easily accessible, and are made of solid metal, the rollers and keys being mounted on iron castings, and the whole as durable and well made as the best sewing machine. Nothing has been omitted to give this grand instrument its

crowning qualities of EXTREME SIMPLICITY AND DURABILITY. The reeds are of organ size, and their volume of tone, and full sustaining and carrying power, equal that of a full organ. The case is handsomely made of imitation black walnut. We carry in stock over 1,000 tunes in sacred and popular music, to which we are constantly adding. Nearly any tune you may want can be furnished (price 25c. each, \$2.40 doz.; postage 5c.). Regular dealers' price of this organ, \$6.00. Weight, boxed, 15 lbs.; length 16 in.; width 13 in.; height 9 in. Our Cut Price, with 3 Rollers, \$4.50; by Express.

WHY IT PAYS to buy our jewelry; we are in the center of the source of supply; we are exceptionally large buyers; we make a specialty of this department and discriminate with great care not only as to merit but also price; being easily available our trade is large, while relatively the expense of handling it is very small; our prices can therefore be shaved away "below the skin"; jewelry dealers as a rule maintain fine establishments in "expensive" locations; all our work is done "upstairs" where there are no "expenses." In buying goods, and jewelry in particular, of us you get what you pay for—the landlord and middleman are strictly outside the deal—See?

THE INGERSOLL "ROYAL" WATCH.

PRICE
\$2.00

For Practical Use, as well as appearance, the "Royal" compares with the Old Time Watches much as a modern railway train does with an old-fashioned stage coach. It is designed to fill the ever-increasing demand that our watches have gained on account of their thorough reliability for a "Gentleman's Watch," and is the successful result of great effort and expense in tools and machinery. It is as neat and handsome a watch as can be found anywhere in the market, and is meeting with unqualified praise from all who see it. It is entirely new, and becoming very popular. The movement is the regular American Lever-smallest lantern pinion, quick train, 240 beats to the minute, stem wind and stem set, and runs from 30 to 33 hours without rewinding. It has an antique bow which greatly adds to its beauty. All parts are handsomely finished; the back plate is artistically engraved, giving it a genteel and rich appearance; and the case, which is a beautiful design of fancy pattern, is made from a new metal which is an exact imitation of gold; wears and looks as well and will stand any test that gold will stand. It is non-corrosive and non-tarnishable. Every "Royal" is thoroughly tested, timed, and regulated before it ever leaves our factory and is sold with our guarantee for 1 year to keep accurate time. The enormous output of our manufactory was inadequate to supply the demand for the "Royal" during the past holidays, and proves beyond doubt the popularity and excellence of this watch.

INGERSOLLS' - GUARANTEED AMERICAN WATCHES have reached a world-wide fame. Their sale has exceeded that of any other watch, not excepting the famous Waterbury. They are the most wonderful of modern productions in quality and price, and are the result of ages of development, focused on one object, having the sole energy and aim of the most complete and perfect factory of its kind in the world. They are purely products of Yankee brains and mechanics—not a particle in their construction being foreign. As introducers of these marvelous watches, we commenced their sale over 3 years ago, since when the entire product reaches into millions. We style ourselves "Watch-makers to the American People," because we make watches of GUARANTEED QUALITY which the MASSES can afford to buy. Whoever supposed a few years ago that a WATCH could be built for a dollar? Not merely a watch, too, but one that would keep accurate time, and be actually more durable than a high-priced one!—one that its manufacturers guarantee more strongly than expensive ones are guaranteed! Yet such a watch we have built and now offer you. How we did it, is a long story and an interesting one; but we can't tell it here. WE DID IT! and you can now participate in the results of this marvelous achievement. Our "Yankee" factory in Waterbury, Conn., is dropping out 2 of these Yankee watches every minute, and our method of selling them is through this medium—our Salesman.

VOLT AND AMPERE METERS.

They are not toys because sold at a low price. They are low in price because they are made in large quantities. Each meter is individually calibrated, and marked by hand to insure accuracy. We could print the scales and paste them on, but they would not be accurate. They are calibrated

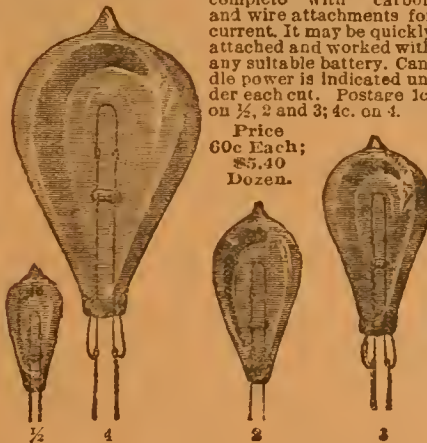

from instruments of recognized standard make, and in the laboratory where care is taken to avoid errors. For amateurs and others experimenting with batteries, dynamos, motors, or using current for any purpose, and to whom the standard instruments are too expensive, these will be found to be just what is wanted, and no student should be without the set of two. Many an electrical experiment has proved a dismal failure at a critical time, on account of insufficient voltage or amperage. This would not occur if the proper instruments were at hand and the current tested. Full directions accompany each instrument, and satisfaction is guaranteed. State whether wanted for amperes or volts. Postage 10c. Our Price \$1.50

THE MEGAPHONE.

An instrument to carry and receive the voice to and from a distance of one or two miles. Used at Yacht, Horse, Bicycle and Athletic Races, Football Games, Shore Cottage, Farm, Country Home, and any place where the voice cannot be easily heard. The Megaphone consists of a peculiarly constructed cone of light waterproof material. When spoken into it carries the voice with wonderful power and clearness to a great distance in any direction to which the phone is pointed. On the water, shore, or in any open country where there are no obstructions, and no local sounds to interfere, it is not difficult to talk and hear to and fro over a distance of a mile with this instrument, while a loud call or hail can be heard about two miles. Voices and other sounds from a distance, which would otherwise be inaudible, can be heard with great distinctness when using the instrument as a receiver, that is to say, listening at the smaller end while the phone is pointed in the direction from which the sounds proceed. Especially with the larger sizes, the results are wonderful. Sizes given are diameter of mouth as they require special boxing. We charge extra for it as below:

12 in. 50c. Boxing 15c. 36 in. \$3.00, Boxing 35c.
20 in. \$2.00, " 25c. 48 in. \$4.00, " 50c.

LAUGHING CAMERA NO. 1.

This scientific curiosity is of best crystal glass, an optical prism, firmly enclosed in a handsome black paper mache box. At one end is

around peephole, with an oblong opening on the opposite side of the box. By placing the eye at the peephole, and reversing the position of the box, back and forth, most extraordinary and amusing effects are produced. All objects can be made to look much longer and narrower or broader and shorter than they are; in fact, so distorted as to create great laughter and fun. This Distorting Mirror, when held in a certain position, will make a person in the same room with you appear 50 rods away and from 15 to 20 feet tall, somewhat resembling a bean pole. By reversing the mirror, the same individual will appear to be about 2 feet in height and as large around as a wash-tub. Send for one and have some fun.

Price, Postpaid, 10c. Each; \$1.00 Doz.

DEVELINE WHISTLE.

This Whistle is constructed on entirely original (patented) lines, viz: A wheel inside of tube produces the sound as the pressure is applied from mouth. The harder you blow, the faster the wheel revolves attaining a speed of 5000 to 8000 per minute. As speed increases the pitch raises; starting at a very low tone it may be carried up the scale fully four octaves, and controlled accurately by the user. Thus a tune may be played by practice, other variations of the greatest novelty may be produced. As the tone raises it grows into a shriek or wail truly heartrendering. If anything can suggest the infernal regions it is this Develine Whistle. Perfectly constructed and heavily plated. Postage 1c. Price 10c. Each;

AMERICAN STEAM LAUNCH.

\$1.75

Our newest and most satisfactory pattern, modeled after a famous propeller, fitted with a powerful little engine and capable of much greater speed than any other toy launch made. Other manufacturers have been making launches that were gaily painted but utterly useless for running purposes. Our "American" is constructed differently, it is built to move through the water, quicker than any other boat, for a full hour without refilling boiler or lamp. In appearance it outshines the best; the hull is of thin metal, nicely painted, measures 12x4 inches and shows the graceful lines of a fast boat; boiler is entirely of polished brass with ribbed sides; engine is very simple and easily understood, and connected to propeller by strong shaft. A good safe launch, easy to operate and sold with our guarantee to be as represented. Postage 30c.

PRICE \$1.75 EACH.

FALSE MUSTACHES AND GOATEES.

Great Reduction in Prices! Fun for the Million!—Here you are boys! Just the thing for a little harmless masquerading. Those mustaches are made of the best material, genuine hair, nicely crimped. They have a wire attachment, allowing them to be fastened to or removed from the face with ease, and when worn cannot be easily told from the real production of razor and soap. Boys and young men can have lots of fun by putting them on in a crowd of friends, who will be greatly astonished at the sudden transformation. The goatees are attached to the face with wax, and like the mustaches can be removed and replaced as often as desired. For private theatricals, amateur minstrel shows, charades, tableaux, etc., where different characters are to be represented, these hirsute ornaments will be found invaluable. Our three illustrations show one and the same person, the difference in appearance being caused entirely by wearing our different styles of hair appendages. The first picture shows a beardless youth of sixteen; the second picture, the same youth wearing one of our mustaches; the third with mustache and goatee. Any boy or man can change his personal appearance in the same manner as shown in our illustrations. We furnish our mustaches and goatees in six colors—gray, red, light brown, medium brown, dark brown, and black. In ordering state color desired. Black and brown are the colors usually sold. Postage 1c. each; 2c. dozen. Price of mustaches, 8c. each; five for 35c.; one dozen 60c.; goatees 6c. each; four for 25c.; one dozen, 40c.

THE COLUMBIAN 1,000 SHOT RIFLE.

1898 MODEL \$2.00

Shoots 1,000 Shots Without Reloading.

Simple, Strong and Durable.

This model is similar in principle to the celebrated Marlin Repeating Rifles, which are sold for \$25.00. It is a new feature in Air Guns, it holds a thousand B. B. shot, and is most simple in its working. It is a gun any one would be proud to carry and own, it shoots with precision and throws a shot for a long distance. All parts are interchangeable and replaced for a few cents; easily taken apart. Walnut stock, enameled frame, nickel barrel, weight 5 lbs. This rifle has been thoroughly overhauled, the more valuable features retained, and entirely new improvements added, making it more easily operated, more accurate, more substantial, possessing more length of stroke of piston, thus securing greater force of the shot. No expense has been spared in securing the highest attainable results, as regarding the foregoing qualities, and the makers having had the experience of years in developing and perfecting this rifle have no hesitancy in making the claim that the Model of 1898 surpasses all previous models. Furthermore, our immense success last season with this rifle enables us to reduce our price materially, in spite of the great improvements. Unavailable. Our 1898 Price \$2.00 Each.

THE NEW "ACME" RIFLE.

This is a new gun of American make and one of the most important products of recent years—both on account of its cheapness and quality. One of its most important features is its detachable stock; by means of a cam button the barrel and stock are parted in less than a second. It has a blued octagon, barrel 22 inches long with perfect blue finish and rifle bore which is guaranteed accurate, fitted with new patent back sight quickly adjustable to every 100 feet up to 700. Its mountings are perfectly made, fitted and case hardened; also its lock, which is Remington Action, provided with shell ejector. It has fine walnut stock with case hardened butt cover. Weight only 4½ lbs. Perfection of stability, compactness and good quality. It shoots No. 22 rim fire cartridges, either short, long or rifle lengths and does such accurate work that its use is by no means confined to youths and is frequently preferred by hunters, who find no fault with its working qualities. We can for special reasons make an extra low price on this rifle and fully recommend it to our patrons both on its quality and price. Our Special Price \$4.50 Ea.

"ATLAS" TARGET RIFLE.

This is an American made Rifle which for accuracy is guaranteed equal to any. In repeated tests that have been made it has out-shot different expensive Winchester. Barrel is drilled from the best special gun barrel steel at the Remington Arms Factory; has new quick twist (1 in 16½ inches) and blued finish, as fine as any; has automatic shell extractor. No "key-holing" will be found on targets used with this gun. A special and valuable feature is the construction of hammer; it cocks down leaving sight and even bore clear from end to end; in its upward and forward action it locks itself so there is no possibility of recoil. Every gun besides other tests, has a special one for strength, giving it a strain of six times the amount ever used in practice. There is little use in buying cheap imported guns when such as this may be had at our price. Breech and stock detach instantly and pack in a small box 5x20 inches; full length 32 inches; barrel 16½ inches; weight 3 lbs. Chambered for 22 short or long cartridges; the simplest and cheapest shooting rifle in the world. Unavailable. Regular price \$4.50. Our Price, \$3.70 Each.

Here is the truest Pocket Compass and the most powerful Whistle ever heard in combination. The Compass is firmly inserted in one side or the top of the Whistle, and is protected by a heavy glass face. Its needle points true North and South; and the letters on the card are large and clear. 8 points are given, and with this Compass any one can readily keep his bearings in the densest forest, on the vastest prairie, or far at sea. The Whistle is a great novelty, designed on a new principle, that renders it the most deafening and powerful known. It can be heard for miles. Anyone can blow it! Such a whistle should be in the pocket constantly. It is a better protection to a lady on a dark night than a dog or a run, for its piercing shriek will instantly frighten off a thug or a thief. The combination is of solid metal, cast in one piece and beautifully nickel-plated; a ring is attached, so that it can be hung to a neck cord, or belt, or carried in the pocket. Postage 1c.

NEW ACQUAINTANCES of course we don't have never dealt with us to have perfect confidence in us; We know who and what we are but YOU may not—the Commercial Agencies and many Bankers, Postmasters and Express Agents throughout the Country and especially in our City know us to whom we refer you. Send us an order about the size of your confidence in us and we shall take care that you will "Come again."

Our Fine Cigars

have an established reputation; their good quality and unmatchable flavor are appreciated by our customers, as evinced by the enormous sales; and in view of this fact we have added several new brands, reduced the price of the old favorites, and still claim for our line superiority over all others sold at double our price. The big contracts we place with the largest factories are accountable for the exceedingly low figures at which we sell. We want only box trade, and to the end of securing the regular custom of discriminating smokers, we sell samples at nearly box prices. A good cigar cannot be described adequately, it must be smoked to be appreciated. If you will try them we will have your orders. There is scarcely a line of merchandise in which there is so much leakage in "middlemen's profits" as in cigars, resulting in a price to the consumer from 3 to 4 times the cost of manufacture. In buying of us you are assured of but one margin added and that a small one.

THE SMOKER'S TIP.

The neatest recent invention for smokers which if used would save many an incurable disease and often a life; the constant contact of the extremely delicate membrane of the lips with the tobacco, drawing out constantly from the nicotine and other impurities from the cigar produces irritation, loosening and rupture of the membrane, ulceration which frequently leads to cancer and blood poisoning. The Smoker's Tip is not a rigid cigar holder, but an elastic tip of pure rubber which fits snugly over the tip of cigar conforming to its shape and not affecting the grip of teeth and lips but giving absolute protection. Postage 1c. on 4. Price 5c. Each; 48c. Doz.

DON'T ASK FOR CREDIT. The key note spelled thus C-A-S-H—we pay cash to get low prices and must GET cash to PAY—we were to do a credit business as most merchants do, we would be compelled to add 10 to 25 per cent to our prices. See?

TOBACCO PIPE FILTER.

For Up-to-Date Smokers.

No more foul or clogged stems or bowls to your pipe; no poisonous nicotine. This wonderful little device when placed in the bowl of the pipe, keeps the stem and bottom of the bowl as free from the foul mass after a month's smoking as if the pipe had never been used, as no wet tobacco or nicotine can ever collect in either. The filter is made of specially prepared packing, which prevents the smallest particle of tobacco from getting into the bowl, but in no way interferes with the draught. Its use cools the smoke and saves tobacco enough in a short time to pay its small cost, as there is no wet tobacco to clean out of the bowl every few smokes. When through using press down top on fuse and it is extinguished. Its mechanism is not excelled by the finest clock work; weighs but 2 ounces, and is far superior to all other lighters, there being no dangling fuse to burn the pockets or greasy substance to soil the clothing. When once used you will never be without it. Half dozen tapers and ½ dozen flints, sufficient for 2 years, go with each lighter. Postage 4c. Price. 72c. Each; \$7.25 Dozen.
